

BARLEY, SPRING - CERTIFIED

HAZEN

Hazen is a six-rowed, smooth-awned variety that was released by North Dakota State University in 1984.

Hazen has performed very well in tests conducted throughout Wisconsin. It has produced very high yields, and test weights have been good. Hazen is medium in height and has very good straw strength. Hazen heads 1 to 3 days later than Morex and about a day earlier than Robust. Hazen is a feed barley.

Hazen is resistant to spot blotch and stem rust, and moderately susceptible to mildew. It is susceptible to leaf rust and loose smut.

KEWAUNEE

LICENSED VARIETY

Kewaunee is a six-rowed, smooth-awned variety that was released by the University of Wisconsin-Madison in 1997. Kewaunee is very high-yielding as shown in Wisconsin statewide trials. Kewaunee has good test weight, lodging resistance, and resistance to leaf rust, stem rust, powdery mildew and stem blotch. Kewaunee heads about the same time as Chilton and Morex, and is approximately the same height as Hazen and Robust. Kewaunee is a feed barley.

Kewaunee is a U.S. Plant Protected Variety (PVPA 1994). Seed of Kewaunee can legally be produced and labeled for sale only as Certified seed by growers who have been licensed by the Wisconsin Crop Improvement Association or its legal agent.

LACEY

LICENSED VARIETY

Lacey is a high yielding malting variety with improved malting quality characteristics released by Minnesota Agricultural Experiment Station in 2000. It is a six row, smooth awn, white aleurone variety with good kernel plumpness. Lacey is average in height with good lodging resistance. It is similar to Robust for scab reaction and resistance to spot blotch.

Lacey is a U.S. Plant Protected Variety (PVPA 1994). Seed of this variety can only be sold as a class of certified seed. A License is required for seed production.
