PVP**RICHARD****LICENSED VARIETY**

Richard is a high yielding mid-season variety released by the Minnesota Agricultural Experiment Station in 2000. It is similar in maturity to Jerry with superior yield performance. It is resistant to smut, moderately resistant to crown rust and has good tolerance to red leaf. Richard is a yellow seeded variety with high test weight.

Richard is a U.S. Plant Protected Variety (PVPA 1994). Seed of this variety can only be sold as a class of certified seed. A license is required for seed production.

PVP**VISTA****LICENSED VARIETY**

Vista is a mid-late season oat variety released by the University of Wisconsin-Madison in 1999. Vista has consistently shown high grain yields in Wisconsin statewide tests with seed test weights similar to Belle. Vista heads two days later than Ogle. Plant height is similar to Troy with lodging similar to Gem. Vista has excellent crown rust resistance and tolerance to barley yellow dwarf virus.

Vista is a U.S. Plant Protected Variety (PVPA 1994). Seed of Vista can legally be produced and labeled for sale only by growers who have been licensed by the Wisconsin Crop Improvement Association or its legal agent.

PVP**SPOONER****LICENSED VARIETY**

Spooner is a high yielding winter rye released by the University of Wisconsin-Madison in 1992. Grain yields and test weight exceed those of Hancock. Spooner heads about one day earlier than Hancock and has excellent winter hardiness. Spooner is tall, averaging about 3 inches taller than Hancock, but lodging less than Hancock. Kernels, wheat-like in color predominate.

Spooner is a U.S. Plant Protected Variety and can only be sold as a class of certified seed..
